EnviroMission has successfully raised additional operational funds to support Solar Tower commercialization.

EnviroMission's 2008 acquisition of the global Solar Tower development license and incorporation of a 100% owned US based subsidiary have informed investment interest from a number of 'accredited investors' out of the US as indicated by a US\$100,000 (AUD\$131,273.22) investment in Solar Tower development with strong indications signaled for further investment.

EnviroMission's Solar Tower development intentions in the US were consolidated recently with the incorporation of EnviroMission (USA), Inc. and its regional headquarters in Phoenix Arizona.

The southwest region of the US, specifically Arizona, has been identified as an ideal Solar Tower development destination based on meteorological data and regional market conditions that include strong mandates and incentives for renewable energy generation.

"EnviroMission is encouraged by the broad support and growing interest to investment in Solar Tower development in the US" said Mr. Roger Davey, EnviroMission CEO.

Ends.
